GROW SPECIAL SEEDS CONTRACT

How does it work:

- Pool Contribution: Liquidity providers (growers) must contribute at least 100 USDT in total value to the BUDS/USDT pool to be eligible
- Seed Generation (LP Tokens): Your contribution grants you LP tokens (special seeds), which must remain locked in Stake for 90 days.
- Harvest Rewards: It's time to harvest! Every 7 days, you can earn rewards proportional to your contribution;

. "Similar but not a farm. I will create the launchpool in uniswap and I need the grow contract to allow and reward wallets that aggregate LP tokens issued by the pool created in uniswap. The contract will block LP tokens for a minimum of 90 days. In return it will allow rewards to be harvested every 7 days.

The rewards are distributed as follows:
