

Budcoin

Cultivating the Decentralized Financial Future

WHITEPAPER

Executive Summary

The idea originates from the need to defend personal freedom and rights against corruption and political impositions, aiming to overcome upcoming macroeconomic and geopolitical challenges. This whitepaper outlines protocols designed to reward individuals supporting and participating in the project. Improving upon costly mining systems, Budcoin utilizes Proof of Stake (PoS) and Proof of Liquidity (PoL) consensus mechanisms, providing a more sustainable and accessible participation model. Budcoin is more than a meme; it is an ecosystem designed to generate passive income in a deliberate manner. Inspired by Bitcoin's mining rewards, leveraging blockchain technology and smart contracts, Budcoin introduces special protocols to reward liquidity providers and token holders

Introduction

Budcoin introduces a crop system that allows participants to harvest up to 30% of the total supply through the Grow Special Seeds system. To access this reward, you must add liquidity to the pool and Plant the special seeds (LP TOKEN) they receive. The 30% distribution extends over more than 100 years. With a gradual distribution decreasing, starting in January 2030, there will be approximately the remaining 15% that will be harvested until the year 2100. Additionally, another 10% of the total supply will be distributed monthly for a minimum of 42 months through the Topping system. To encourage the ecosystem, we also launched a collection of 100 exclusive NFTs that will be raffled monthly among token holders. The platform will allow the NFTs to be sold and auctioned

Cultivation Mechanics

1 GROWING SPECIAL SEEDS:

The Grow Special Seeds contract encourages sustainable investment and long-term commitment. .

How does it work:

- Pool Contribution: Liquidity providers (producers) must contribute at least 100 USDT in total value to the BUDS/USDT pool to be eligible.
- Seed Generation (LP Tokens): Your contribution grants you LP tokens (special seeds), which must remain locked in Stake for 90 days
- Harvest Rewards: It's time to harvest! Every 7 days, you can earn rewards proportional to your contribution; Reinvest and harness the power of compound interest.

Cultivation Mechanics

Distribution and rate:

The contract will distribute 30% of the total supply over the years. A 1% fee is charged for each harvest, which goes to the Marketing portfolio for the development and promotion of the project,

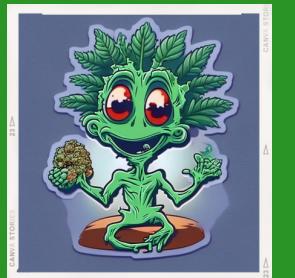

This commission can be reduced by 50% if 1,000,000 holders apply for the contract.

2 TOPPING 30:

Introducing "Toppings" cloning, with up to 30 toppings every 30 days! Are you a passionate BUDS grower with at least 100 USDT? This is your time.

Topping Process:

- Distribution of 50,000 BUDS monthly, the first to claim gets 5,000!
- Gradual reward reduction: Each subsequent claim sees a 10% reward reduction, ensuring a fair and sustainable distribution over time.
- Additional purchase option: You can buy additional shares to enhance your experience for just 1000 BUDS.

Cultivation Mechanics

Eligibility and rights:

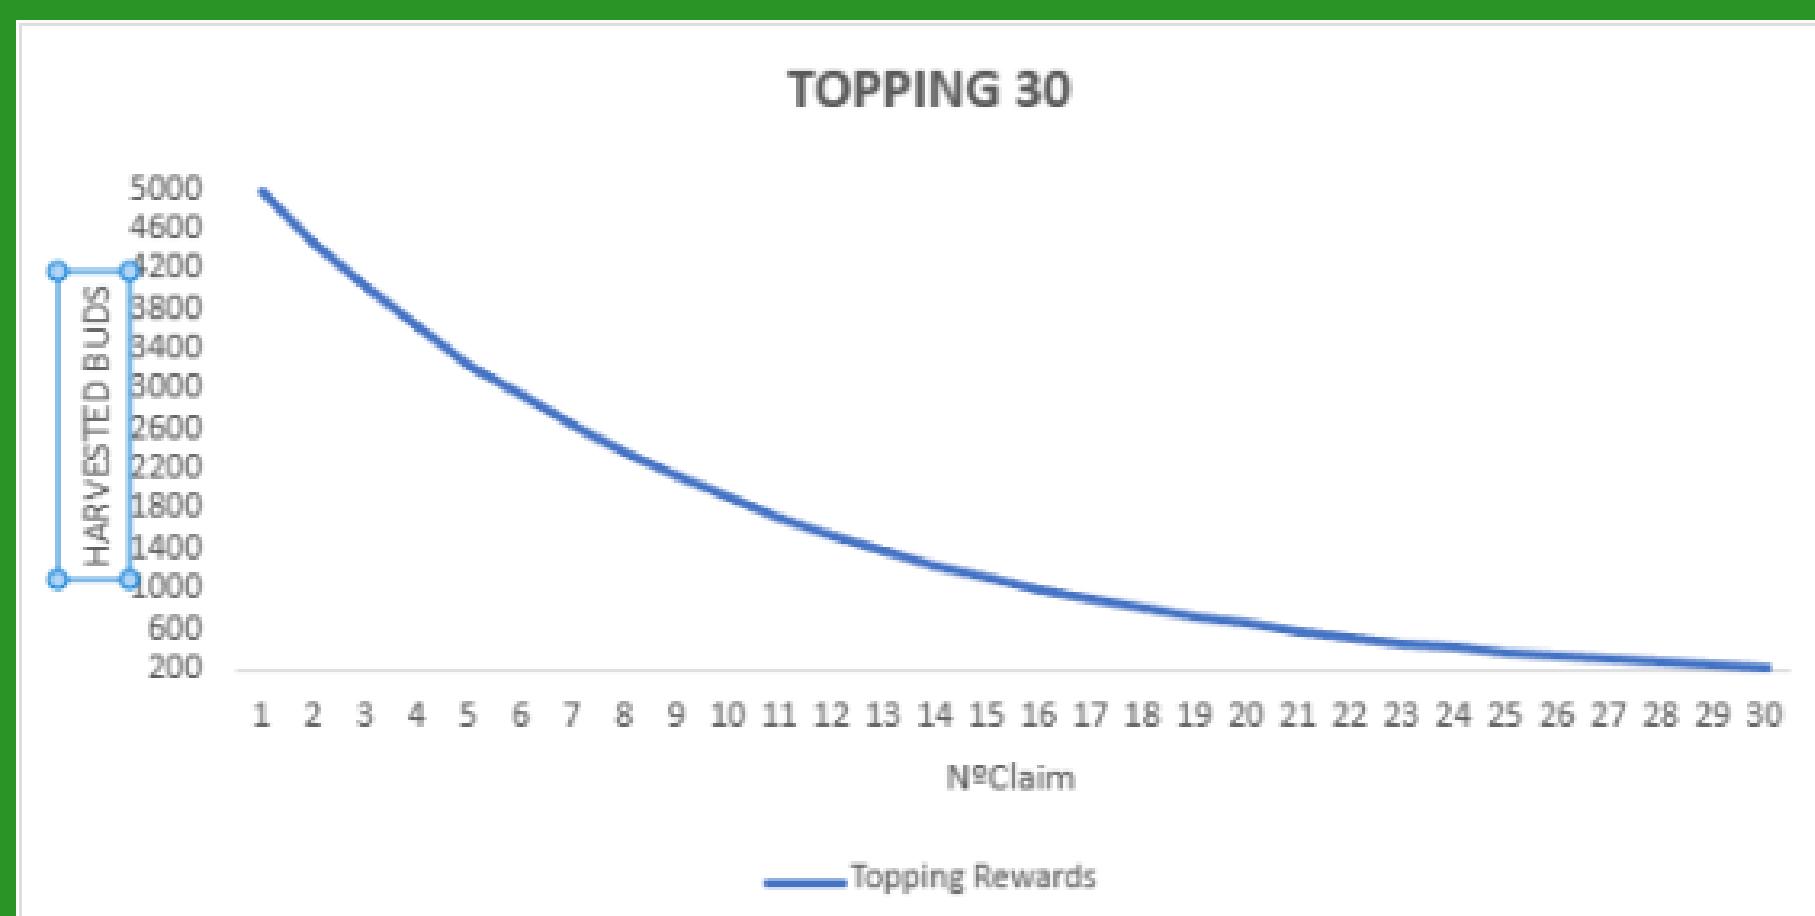

- Liquidity providers are entitled to claim Topping.
- Token holders without participation in the liquidity pool are not entitled to rewards.
- Participation in Topping requires an LP (Liquidity Provider) value of at least 100 USDT.

Distribution Mechanics:

- The first to make a claim wins 5000BUDS!
- Distribution of 50,000 BUDS every month ,This amount can only be reduced by the growers, 1,000,000 signatures are needed to activate the reduction.
- To encourage diversification, the same wallet will only be able to claim once every 3 claims.

Contract reset:

- Every 30 days reset is initiated; the remaining tokens are sent to the marketing address.
- Any token holder can trigger the contract reset after 30 days.

Team and Community

The creative team does not own reserve tokens but actively participates in the protocol, promoting its use and awareness

Why Budcoin?

Budcoin pays homage to the queen of medicinal plants, celebrating the rise of the medicinal use of CBD and defending freedom of choice in matters of personal health, a much debated topic in recent times, where society's rights and freedoms have been violated. We advocate and defend freedom and self-care through traditional and alternative methods in an increasingly controlled and manipulated world, where rights and freedoms are constantly being curtailed under the guise of safety and security.

CBDC ✗

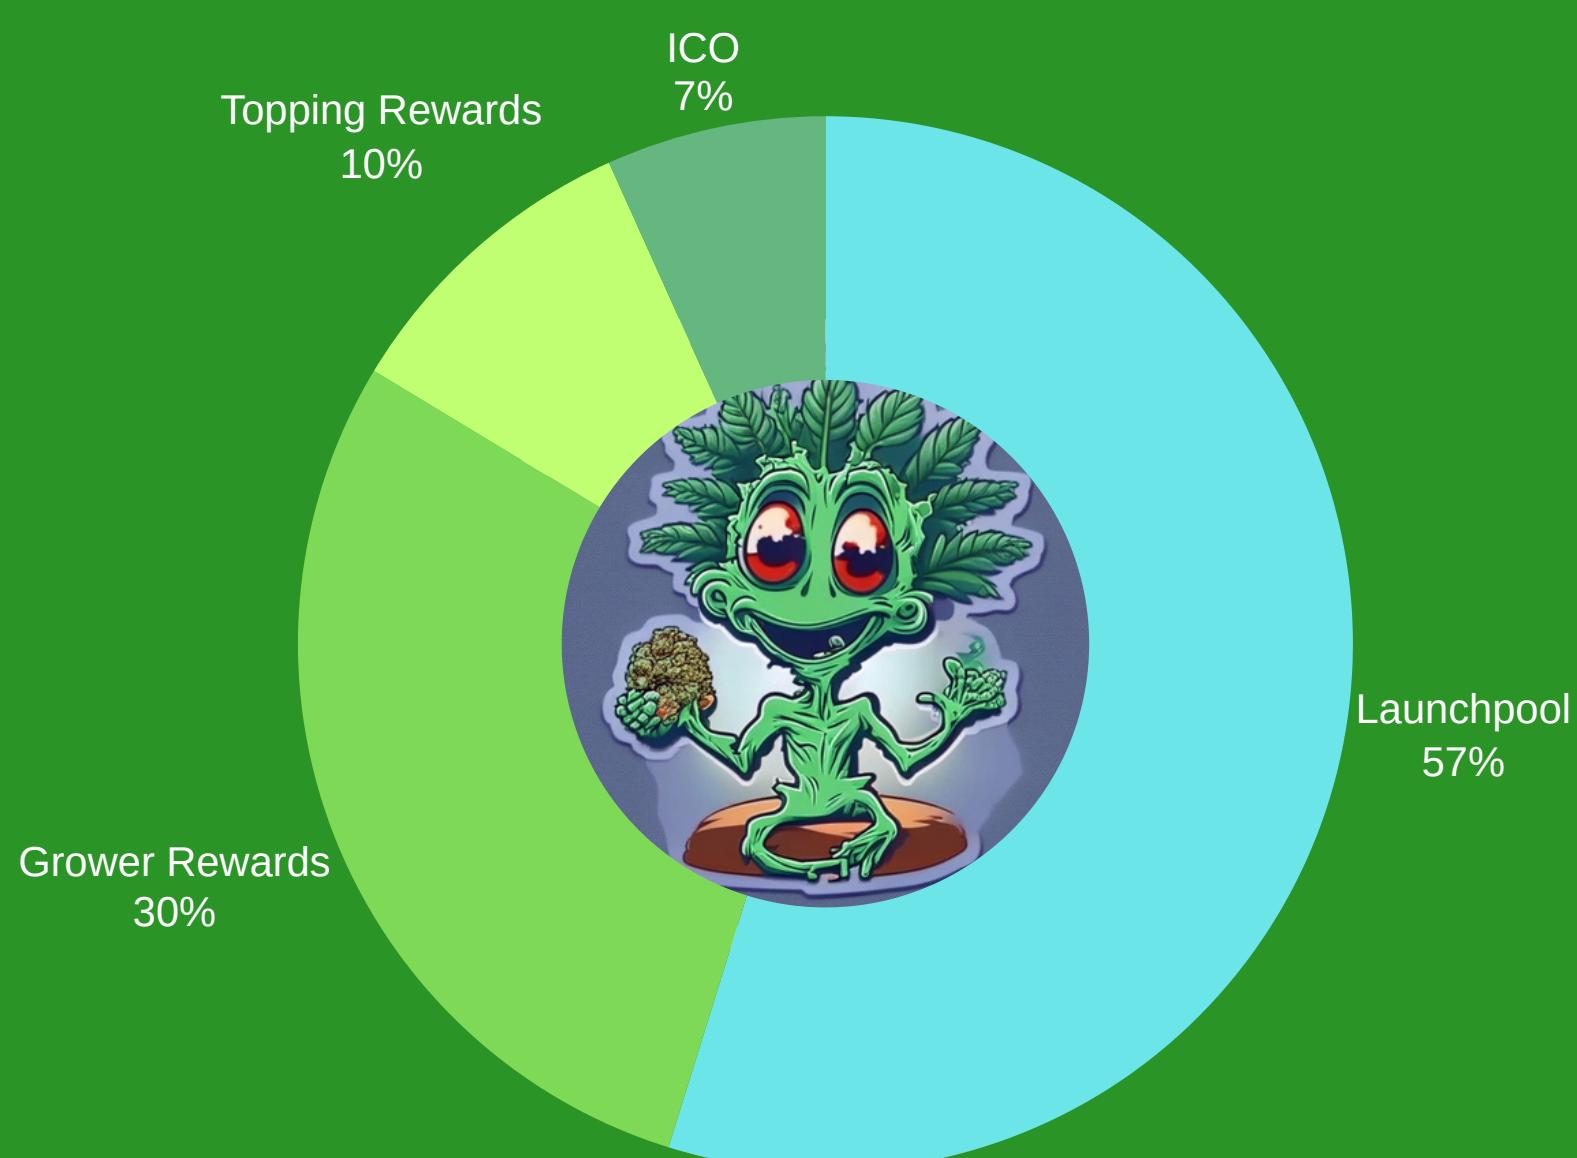

Launchpool

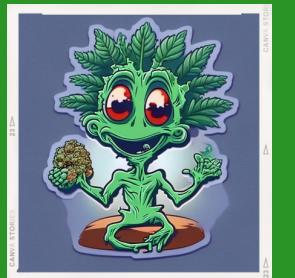

- 57% Launchpool "Liquidity blocked, LP Token burned".
- 30% Grower Rewards
- 10% Topping Rewards
- 7% ICO "Proceeds go to the Launchpool"

With the Special Seed Cultivation 1M tokens will be distributed during the first year, this amount will be gradually reduced.

With the Topping System 10% of the total supply will be distributed, with 50,000 BUDS per month.

*This amount can only be reduced by the growers, 1,000,000 signatures are needed to activate the reduction.

Value Potential

Looking at the success of something as simple as a meme cryptocurrency, Budcoin is born. Analyzing the performance of Pepe, Shiba, Dogecoin... it is estimated that with a small percentage of the average market cap of the top 5 meme cryptocurrencies, Budcoin could easily obtain a market cap of 100 million. Our intention is not to have a worthless token, allowing ordinary people to hold millions for pennies. Budcoin is exclusive and limited; our intention is for many people to have a few buds and, as they harvest more, its value increases. If we achieve a market cap of 100 million, each unit of BUDS would be priced at over \$6, so the Budcoin ecosystem would be giving out almost a million dollars in rewards every month

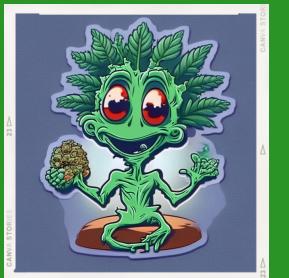

Rewards distribution and reductions

Active participants can get part of the 130,000+ BUDS that will be distributed monthly during the first year. This system ensures that the community will continue to benefit in the long term, even beyond the year 2100.

The reductions of the Special Seed Cultivation rewards are contractually stipulated and cannot be changed

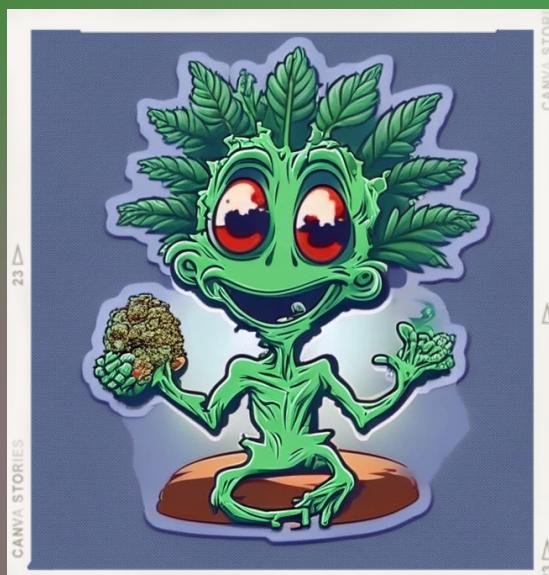

YEAR	ANUAL DISTRIBUTION	MONTHLY DISTRIBUTION	TOTAL DISTRIBUTED	REWARDS AVAILABLE
2024	1.000.000	83.333	1.000.000	5.300.000
2025	850.000	70.833	1.850.000	4.450.000
2026	475.000	39.583	2.325.000	3.975.000
2027	275.500	22.958	2.600.500	3.699.500
2028	225.000	18.750	2.825.500	3.474.500
2029	75.625	6.302	2.901.125	3.398.875
2030	50.000	4.167	2.951.125	3.348.875
2031	45.000	3.750	2.996.125	3.303.875
2032	45.000	3.750	3.041.125	3.258.875
2033	45.000	3.750	3.086.125	3.213.875
2034	45.000	3.750	3.131.125	3.168.875
2035	45.000	3.750	3.176.125	3.123.875
2035-2105	44.600	3.717	6.298.125	1.875

- Example of Annual Distribution (in Tokens):
- 2024: 1,000,000
- 2025: 850,000
- 2026: 475,000
- 2031: 45,000
- 2035: 44,600
- 2105: 44,600

The Decentralized Revolution

Budcoin is not just a token meme; it is a new community that promotes financial and personal freedom, with a decentralised vision and a specific farming system to harvest new tokens, getting paid for promoting and supporting the ecosystem, and fighting against a guided and manipulated world that seeks to gain absolute control of society through the implementation of CBDCs

Technology and Blockchain

Budcoin uses ERC-20 technology on Ethereum, with open source smart contracts deployed on the blockchain. The community owns the token, the creative team has no reserve tokens. Contracts to harvest buds and earn rewards are created using open source smart contracts deployed on the Ethereum blockchain, ensuring security and immutability. If you find any bugs or vulnerabilities in the code, please notify foundation@budcoin.world.

Road Map

PHASE 1

- Development and deployment of the BUDCOIN token.
- launch of the website.
- Launch of the community on social networks.
- Development of smart farming contracts..
- Security testing and audits.
- Special ICO token sale to obtain launch liquidity

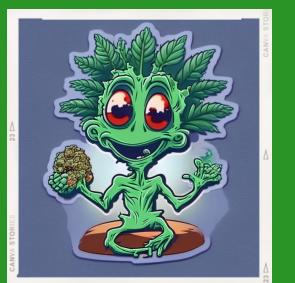

PHASE 2

- Launch on Uniswap.
- Launch of farming systems.
- Strategic partnerships with industry leaders.
- Development of DAPPS utilities for the community.
- Promotion of Budcoin as an option for passive income and store of value.
- Monthly start of NFT airdrop.

PHASE 3

- Launch NFT Marketplace
- Strategic partnerships with industry leaders.
- Expand ecosystem with new use cases, upgrade 2.0.
- Obtain more than 1,000,000,000 Market Capitalization
- Become the best meme, handing out millions of dollars a month
- Extensive adoption as an investment pool

Technology and Blockchain

Special Narrative

In the face of socio-economic problems and with the continuous devaluation of the Euro, the Dollar and fiat currencies in general, Budcoin offers a secure and decentralised alternative as a reserve to generate long-term value. Budcoin is an alternative currency and DeFi platform distinguished by its value potential, farming system and focus on individual freedom. More than just an investment, it is a movement for personal and financial freedom, with a limited supply, our goal is to make it easy for many people to generate passive income and get great returns on their investment.

Growers' Decisions

They can reduce 50% of the commissions received by the marketing wallet from the harvests.

- For the first reduction 1,000,000 signatures are needed.
- For the second reduction you need 2,000,000 signatures.

They can also reduce the initial topping reward by 50%

- 1,000,000 signatures are required.

These adjustments will be necessary as the market capitalisation grows, and will allow the topping distribution period to be extended and the reward distributed will not be so exaggerated. Join the financial revolution and grow your future with Budcoin
